**The 32nd Japan International Machine Tool Fair Exhibition our collaborative robot AGV at Okuma's booth**

## The 32nd Japan International Machine Tool Fair **JIMTOF 2024**

We are pleased to announce that we staged a successful exhibit featuring our collaborative robot AGV at Okuma's booth at the 32nd Japan International Machine Tool Fair (JIMTOF), which was held at Tokyo Big Sight from November 5 to 10, 2024.

The display at Okuma's booth, which focused on 5-axis machining centers and multitasking machines, centered on two themes—"Automation Solutions" and "Process Integration Solutions"—to address challenges such as labor shortages while reducing environmental impacts.

Hokuto's collaborative robot AGV was featured under the "Automation Solutions" theme in an exhibit entitled "LB3000 EX III (M) turret type + AGV."

Please visit Okuma's special JIMTOF 2024 website for more information:

<https://www.okuma.co.jp/show/jimtof/2024/?c=1b4b5c20f31e66b6-36e361cd86dce6cb>

Discussions with visitors yielded a renewed awareness of the fact that there continues to be latent demand for factory automation despite advancements in process automation. We also identified challenges related to customers' recognition and understanding of AGVs. We look forward to utilizing the valuable feedback gathered at this exhibition to further improve product development and services.
